

Output voltage is  $((R6/R7)+1) \times V_{ref}$   
 use value in schematics for 5V output or  
 820, 1200 for 3.3V

TX1 is optional  
 without it, use TX1 pad for output  
 connection;  
 with it, don't mount R11, cut GND track  
 and use R11 pad for output connection.
